

Avatier Identity Management Suite

Mitigate risk with absolute control and convenience.

Unfocused Identity Governance and Administration (IGA) Efforts Put Organizations at Risk

In addition to the day-to-day tasks IT professionals tackle each day, they also face the titanic challenges associated with Identity Governance and Administration (IGA): too many identities and directories; inconsistent password policies across systems; diverse, time-consuming auditing processes; too much repetitive manual work; and an ever-increasing need to stay on top of compliance regulations. One misstep makes an organization vulnerable to costly risk that can jeopardize its brand, reputation and intellectual property.

Meet compliance regulations. Mitigate risk. Unify IGA operations.

Incorporate innovation to reinvent your IAM strategy

Today's organizations understand that innovative, strategic business technology effects change in business processes and consequently transforms the way an organization runs. No place is innovation and business technology a better fit than in identity and access management. It is here that organizations can optimize business processes, stay on top of regulatory requirements, and mitigate the continuous risks that threaten the very essence of an organization.

The Avatier Identity Management Suite (AIMS) blends innovation with business technology to spark a revolution in Identity Governance and Administration (IGA). From its unique user-provisioning IT Store, to its time and cost-saving self-service model in password management, to its advanced functionality in access certification and auditing, AIMS delivers a number of strategic benefits to meet compliance and governance requirements, improve information security, and optimize overall IT operations. Second to none in innovation, Avatier gives you the tools you need to reinvent your IGA strategy.

Built for functionality

The AIMS service-oriented identity management framework is designed with functionality in mind. Characterized by fast installation, easy configuration and minimal ongoing support, the AIMS architecture exposes your existing infrastructure as business services that can be used in new, flexible and more meaningful ways.

One suite framework.
Avatier Identity and Risk Management Suite.

We cover your apps

Unlimited App Support.

SAP, PeopleSoft, and JD Edwards, Oracle? We support those apps. Salesforce, NetSuite, Google Apps, SuccessFactors, Microsoft Lync? We support those apps too. In fact, whether enterprise, in-house or cloud, AIMS supports any app you can think of. Our more than 90 connectors out of the box see to it that you're covered.

We're international

Pick a Language. Any Language.

AIMS includes out-of-the-box support for 30 languages, meeting your needs for language diversity in today's global organizations. If your preferred language is not on our list, make a request for it. We will accommodate.

You Click It. We Ticket.

Despite the ease-of-use inherent to AIMS, we understand that questions pop up. That's why Avatier offers integrated help desk ticketing for all tasks. Open your own support case online and get the help you need to tackle whatever it is that stands between you and IGA bliss.

It's payback time

Who else can guarantee a measurable payback from your IGA implementation in fewer than 60 days? No one. AIMS is set up, configured and tested in less than a day and no client-side installation. With Avatier, your organization is quickly and easily set on the path to operational efficiency, enhanced security and the lowest total cost of ownership.

Operational savings, realized.

Delivering operational services with a “business process first, technology second” mindset empowers an organization’s IT investments to truly live up to their promise. Operational services must be executed with a focus on staying in tune with your business as it changes.

IGA Unification, Efficiency and Security

Avatier, the identity management innovation leader, offers a unified Identity Governance and Administration (IGA) solution that lowers costs and risks. The Avatier Identity Management Suite (AIMS) automates workflow for user provisioning, access governance, service catalog, and password management operations. AIMS delivers the security benefits your organization requires for risk prevention. It streamlines business operations for greater efficiency to lower costs impacting your bottom line.

AIMS features SSO for IGA access, SMS strong authentication for self-service password reset, patented IT store intelligence for user provisioning, and revolutionary risk mitigation throughout. The Avatier identity manager assigns risk values based on systems, access privileges and business user accounts. Avatier's Risk Radar™ gives a holistic view of an identity's enterprise risk. It looks beyond mere access to include assets and business attributes to determine risk scores and automate alerts.

 **Identity Enforcer™** uses a shopping cart experience with patented IT store intelligence for provisioning access, assets and assignment.

 **Compliance Auditor™** revolutionizes the way enterprises conduct access certification audits by enabling business users to participate in reviews.

 **Service Catalog™** visually represents items in an IT service catalog and determines a risk scores based on historical and real-time data.

 **Single Sign-On™** bundles single sign-on (SSO), password policy enforcement, self-service password reset and two-factor authentication in one system.

Features

ROI Calculator.

During the evaluation process, let our identity experts prepare a hard dollar customized cost savings justification for your team. We are so confident in our savings formulas that we built them right into our technology. Once in production our product usage will prove its value daily.

Branding.

Customize everything from text, images and even CSS style sheets without any coding. Simply export any language text to XML or a spreadsheet. Modify it. Upload it. It is that easy to customize text. All graphical images are all stored in one directory for simplicity.

Scalability.

Support identity governance and administration unification without impacting your end users, network and systems. Give your end users fast response time with load balancer support. Scale the solution by continually adding more servers at no additional cost. Keep your disaster recovery team satisfied with database cluster support for all repositories.

Delegated System Administration.

What good is an access control solution if it cannot limit access to itself? Limit access your marketing branding team gets to your enterprise identity management system. Control who can change the user identity mapping file. Avatier Identity Management Suite is enterprise ready for real world operational challenges.

Tamper Detection.

Get notified when your identity databases are edited. Your auditors depend on its accuracy. Your Service Desk staff uses it routinely. Your employees shop for access daily through it. Tamper Detection gives your organization the assurance that mission critical audit data is accurate and safe.

Innovative Identity Management Delivered

Avatier is a leading provider of enterprise IGA solutions. Avatier Identity Management Suite (AIMS) is defining the future by enabling business line managers to take control of the identity lifecycle and reduce risks through patented IT storefront technology and the first provisioning approval iPad application. Avatier solutions dramatically decreases time to value and maximize operational efficiency in regard to managing passwords, provisioning users and complying with regulatory requirements.
