

StorageProfiler

EMC Celerra Module: Interrogate Your Data

Profiler for EMC Celerra File Servers offers visibility into the Celerra environment and configuration providing file analysis, automated usage trend reporting, capacity planning and real-time monitoring.

KEY FEATURES

- Detailed file analysis shows how space is being used on the file server, who is using the space and what size and type of files are being saved
- Profiler Rx saves historical data on configuration, status and performance of the file server for trending and forecasting
- Space reclamation by reporting the amount of free space on a volume allowing for the full utilization of available space
- Profiler Rx reports and trends important performance statistics in each data mover (CPU utilization, memory utilization, network interface utilization, etc.)

Technical Specifications

Server Requirements
 Sun Microsystems Solaris
 Microsoft Windows 2000/2003 Server or Professional
 Memory Needed: 512 MB
 Disk Space: 1 GB
 Console: Internet Explorer, Netscape/Mozilla, Firefox

Support for: Celerra 5.x

Monitor and Report On Celerra File Servers

Profiler for EMC Celerra is a web-based reporting and monitoring solution providing a consolidated, centralized view of one or multiple Celerra file servers.

Profiler for Celerra eases the pain of managing Celerra file servers by offering operator-friendly location-independent monitoring and reporting. From any supported web browser, administrators can view status or run configuration and performance including the breakdown of logical storage devices or file systems, and export information to maximize the efficiency of their investment in EMC Celerra systems.

Profiler Has The Prescription For Customers' Pain

Profiler helps organizations reduce operational expenses, maximize storage investment and lower the total cost of ownership by addressing the following areas: Backup/Disaster Recovery, Server Consolidation, Chargeback/Tracking Resource Usage, Planning for Future Expenditures, IT Resource Justification, Asset Management, Management Reporting and File Analysis. Profiler Rx helps administrators spot trouble and resolve problems before they affect end-users.

Save Time By Simplifying Report Consolidation

Profiler leverages Web server-side technology for easy installation, quick performance and immediate payback. Profiler offers off-the-shelf reports depicting usage and performance trends at the disk, user, file system and partition levels for a variety of IT environments.
